

Enriching the List

Martin Newman: Listing Information Manager, [Historic England](#)

In June 2016 Historic England Launched [Enriching The List](#), a development of the [National Heritage List for England](#) (NHLE) to enable those using The List to add additional information about the list entries and photographs of them.

The NHLE contains almost 400,000 entries comprising Listed Buildings, Scheduled Monuments, Registered Parks and Gardens, Registered Battlefields and Protected Wrecks.

Enriching The List has been an immediate success with over 10,000 contributions published so far containing 15,000 images. This presentation will look at how Historic England developed the project using open source technology and an Agile methodology as well as the results of the project. Examples will be used to show how this development is delivering results in terms of outreach and engagement as well as gaining additional information through crowdsourcing.
